FCC
SUBJECT “RE: DELETE, DELETE, DELETE” Request

Dear Sir/Madam:

I have been an Amateur Radio operator for 25 years, Extra Class license AA1Q. and permitted by FCC to operate in the following Frequencies and Powers:

Frequency Bands and Privileges:

- HF (High Frequency): Extra Class licensees have access to all HF bands (3-30 MHz) and additional segments within those bands.
- VHF (Very High Frequency): Access to the VHF bands (30-300 MHz).
- UHF (Ultra High Frequency): Access to the UHF bands (300-3000 MHz).
- SHF (Super High Frequency): Access to the SHF bands (3-30 GHz).
- EHF (Extremely High Frequency): Access to the EHF bands (30-300 GHz).

Power Limits:

- Maximum Output Power: The maximum transmitter output power allowed for all amateur bands is 1500 watts PEP (Peak Envelope Power)

However, FCC 47 C.F.R, Part 95 Subpart E, General Mobile Radio Service (GMRS) states:

- $35 License fee for 462 MHz and 467 MHz above 2 watts (free up to 2 watts for FRS)

In another words, FCC requires me to pay another $35 to obtain a separate license for operating in the General Mobile Radio Service (GMRS) frequencies of 462 MHz and 467 MHz which I am already licensed to operate (See UHF above) with Power over 2 watt which I am also already licensed to operate (see 1500 watts above).

Please update the FCC FCC 47 C.F.R, Part 95 Subpart E General Mobile Radio Service (GMRS) that “Amateur Extra Class Licensed operator are exempt from GMRS license requirements”

Best regards,

Dr. Andy Huang
